*The new
lab will work on.*

Wide variety hygiene articles such as can baby diapers, incontinence products, feminine hygiene, wipe and wet wipes, underarm pads, toilet paper, napkins, etc. here is independent and neutral in comparison to analyzing and presenting existing research methods or be market leaders.

Hygiene producers appreciate the fast availability of laboratory results, which are an important component for a accurate optimization process on the machines.

This is another help protect the customers to be more successful!
